Current Disturbances and Two-Day Cyclone Formation Chance:  < 40%  40-60%  > 60%
Tropical or Sub-Tropical Cyclone:  Depression  Storm  Hurricane
 Post-Tropical Cyclone or Remnants

For the North Atlantic...Caribbean Sea and the Gulf of Mexico: A disorganized area of showers and thunderstorms is located about midway between Africa and the Lesser Antilles. Some slight development of this disturbance is possible during the next day or two while it remains nearly stationary. * Formation chance through 48 hours...low...10 percent. * Formation chance through 5 days...low...10 percent. A non-tropical area of low pressure is forecast to form over the central Atlantic in a few days. The low could gradually acquire subtropical or tropical characteristics while moving slowly northeastward during the middle of next week. * Formation chance through 48 hours...low...near 0 percent. * Formation chance through 5 days...low...20 percent

Hazardous Weather

Rain Chances Continue Today

Weather Forecast Office
Fort Worth, TX

Saturday

Issued Aug 11, 2018 5:27 AM CDT

f t NWSFortWorth

weather.gov/fortworth

Rain chances will continue through today, especially south of Interstate 20. Heavy rain will be a threat, leading to some locations experiencing localized flooding in poor drainage areas. Highs will be in the 80s throughout the region

Saturday Highs/Rain Chances

Weather Forecast Office
Lake Charles, LA

High temperatures and rain chances 7am to 7pm Saturday

Issued Aug 11, 2018 5:19 AM CDT

f t NWSLakeCharles

weather.gov/lch

Saturday: Another day with moderate chances of rain across the area with the greatest threat of thunderstorms closer to the coast. Widespread cloud cover will help keep temperatures lower though, with highs only expected in the mid to upper 80s.

Hazardous Weather

Today

Weather Forecast Office
Houston/Galveston TX
Issued Aug 11, 2018 4:00 AM CDT

Several rounds of showers and thunderstorms through this evening will have brief heavy rainfall, frequent lightning and gusty winds.

High temperatures are expected to struggle to reach 90 degrees across much of the area.

f @NWSHouston

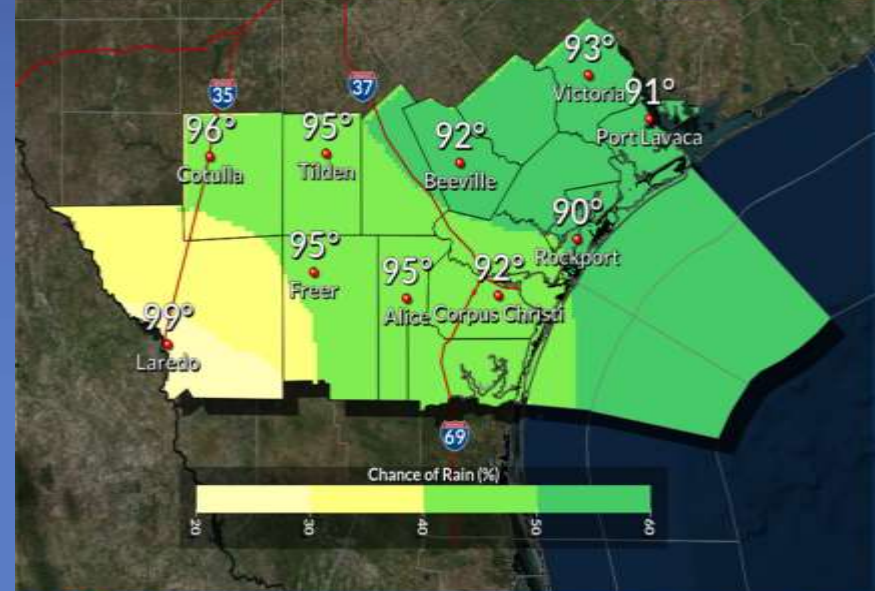

weather.gov/hgx

Expect several rounds of showers and thunderstorms through this evening. Brief heavy rainfall, frequent lightning and gusty winds will be possible.

Today

Scattered showers and thunderstorms

Weather Forecast Office
Corpus Christi, TX
Issued Aug 11, 2018 5:16 AM CDT

f NWSCorpus

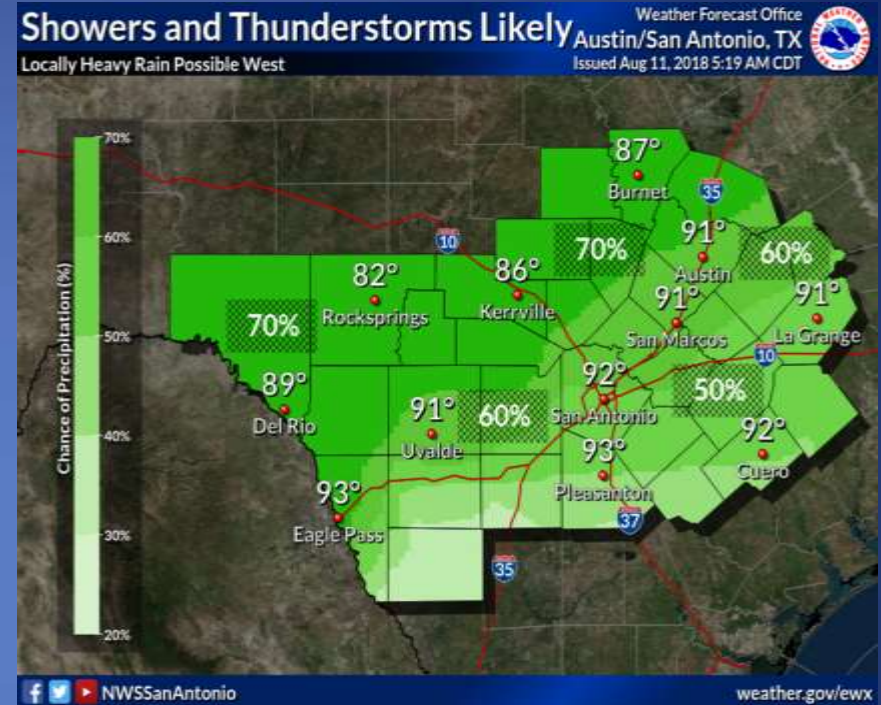

weather.gov/crp

Scattered showers and thunderstorms will be possible today across South Texas and over the Middle Texas Coastal Waters. Highs will be near 90 near the coast to near 99 along the Rio Grande.

Hazardous Weather

Scattered showers and isolated thunderstorms will be possible today across deep south Texas under partly sunny skies as moisture moves into the region off the gulf. The increase in cloud cover is expected to hold temperatures in the 90s across the area. For any mariners heading out today, small craft are advised to exercise caution across the bay and near-shore gulf waters

Scattered showers and thunderstorms will develop over parts of the Southern Edwards Plateau, Hill Country, and Central Texas today. A few storms could produce brief heavy downpours. An inch of rain is possible in a few places mainly out west. With the clouds and rain temperatures will be lower. Highs will range from the middle 80s to the middle 90s.

Hazardous Weather

Chance of rain continues Today

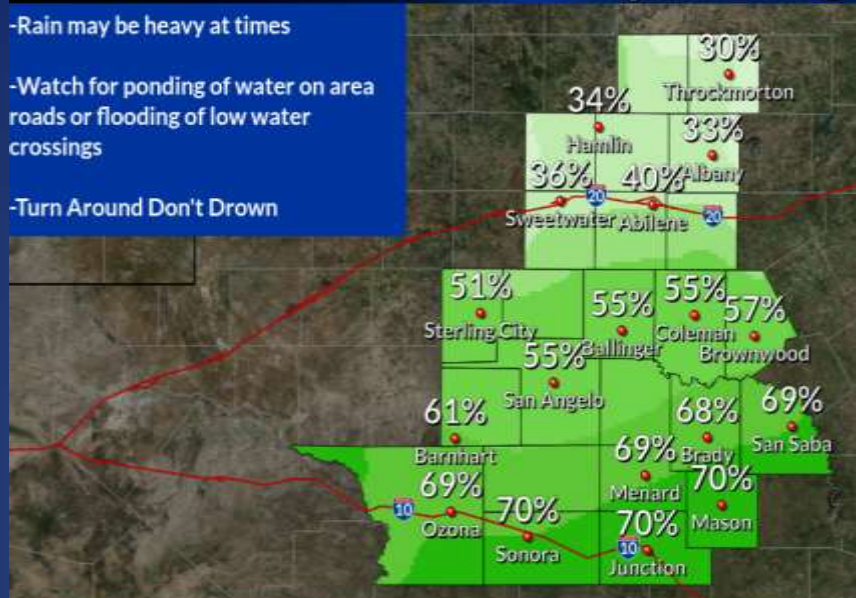

Weather Forecast Office
San Angelo, TX
Issued Aug 11, 2018 5:00 AM CDT

-Rain may be heavy at times

-Watch for ponding of water on area roads or flooding of low water crossings

-Turn Around Don't Drown

f NWSSanAngelo

weather.gov/sjt

Showers and thunderstorms should redevelop today. Best chance south. Rain may be heavy at times. Use caution when you see water over the road. Remember, Turn Around Don't Drown!

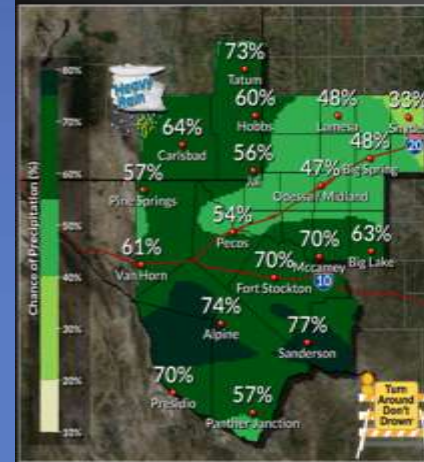

A Stormy Saturday

Heavy rain could lead to localized flash flooding

Weather Forecast Office
Midland/Odessa, TX
Issued August 11, 2018 3:13 AM CT

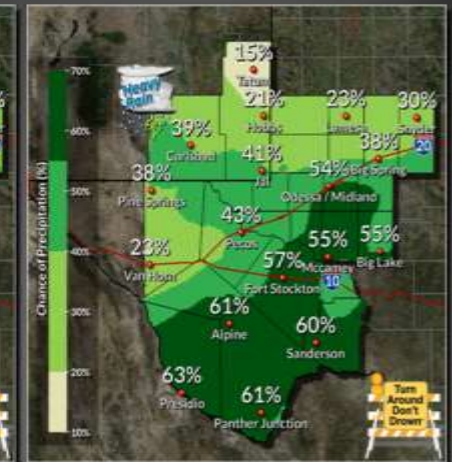

Today's Storm Chances

f NWSMidland

weather.gov/maf

Tonight's Storm Chances

An upper level low will keep rain chances across West Texas and southeastern New Mexico through tonight. Rainfall will be scattered, but locally heavy rainfall amounts could result in localized flash flooding

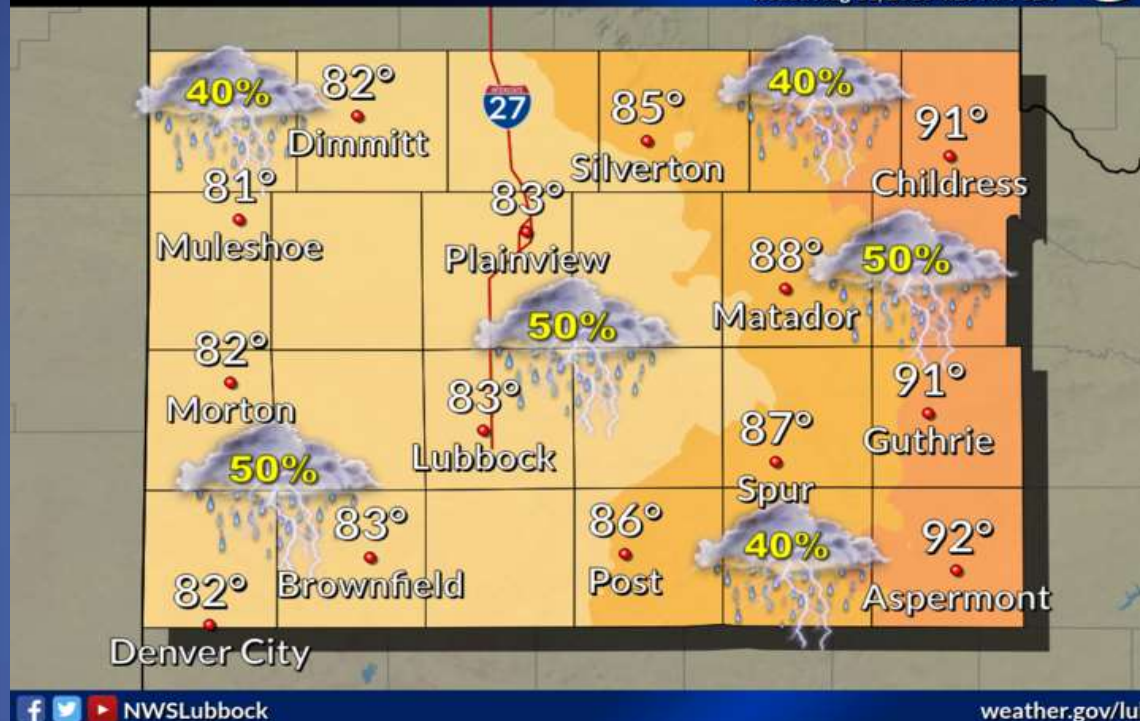

Hazardous Weather

Today: Scattered Afternoon Storms

Weather Forecast Office

Lubbock, TX

Issued Aug 11, 2018 4:29 AM CDT

Scattered thunderstorms should develop by midday and produce heavy downpours and strong winds at times. Partly to mostly cloudy skies will keep highs pretty comfortable for late summer.
